

Does Your PBM Consultant:

Have **ONLY** your best interests as a singular focus?

Accept reimbursement for placing business?

Work to uncover the hidden costs for your organization?

Who We Are?

We are a full service, independent pharmacy benefit consulting firm serving self-funded employer groups and union trusts of all sizes and types. Unlike our competitors, we do not accept money from any entity for placing business with them. Instead, we continuously scour the market searching for "Best of Breed" vendors who offer the highest quality products and/or services at the lowest price available.

What We Know?

- Many PBMs are doing very well for their stockholders, but not so much for their clients.
- You are probably paying more for medications that you should.
- Average wholesale price (AWP) discount guarantees, which are offered by PBMs are pretty much worthless.

Why Choose Crystal Clear Rx?

- We are unique among pharmacy benefit consultants as our focus is not on AWP discounts or false guarantees from PBMs.
- Our research and analysis are unique, more in-depth than any other PBM consultant group.
- We are laser focused on enhancing member experience.
- Our clients and their members save anywhere from 15%-40% annually on their drug spend!

How We Do It?

- We manage every aspect of the pharmacy benefit, including PBM pricing, member utilization, drug mix and plan design.
- We work with vendors to obtain the most value, cost mitigation and improved outcomes available.
- We negotiate contracts that protect our clients and deliver savings.
- Help clients interpret claims data and implement strategies to lower pharmacy and medical costs.
- Our proprietary Crystal View Analytics software is utilized to identify focus areas that achieve a level of outcomes and savings exceeding expectations.
- Evaluate TPA contracts for our clients to ensure that they are getting the best service available at the lowest possible cost.
